

The Most Trusted Name in PVC Doors

Enjoy Nandi's range of decorative doors, specially manufactured for your home. Built to withstand for atmospheric changes like heat, cold and moisture. Nandi doors are made from warp resistant materials that are both aesthetically appealing and durable. Created from quality PVC compounds and additives in a totally state of the art environment, the manufacturing process is overseen by a team of technologists who monitor the process every step of the way. The finished product is therefore fit to pass the scrutiny of the most discerning eye. Nandi brand PVC doors are available for use in different domestic areas, and are the preferred choice for kitchens and bathrooms where even water and moisture do not affect or alter their elegant appearance and excellent texture. With Nandi PVC doors you will never face problems of sagging or warping, due to innovative fabrication techniques. The crowning feature of Nandi PVC doors is that they do not require regular painting or polishing as they retain their sheen and colour intensity year after year.
